Novice

60. These Boots are Made for Walking: An Open Design

Section G - Open class

Class

61. Have fun with your collection of leftovers in a vase! Voting by members will determine the People's Choice Award.

DESIGN DESCRIPTION

DESIGN: A combination of fresh and/or dried plant materials, with or without other objects arranged to create an artistic unit.

PARALLEL DESIGN: A design in which three or more groupings are placed in a parallel manner with open spaces between the groupings. Parallel direction may be vertical, horizontal or diagonal.

PAVE DESIGN: Pave is a technique of placing groups of plant material that have been cut short, close together to form undulating mounds of colours, textures, shapes and sizes. Any plant material e.g. flowers, foliage, cut stems, fruits, vegetables, moss, etc. and plant parts may be used.

UNDER WATER DESIGN: A design with part(s) placed under water to create interest. Although the design must have part(s) under water, no definite percentage is required. A portion of the design must be above the water line. The parts under water and out of the water must form a unified design.

MINI DESIGN: A design with maximum dimensions of 12.7 cm (5") in any direction (height, width, depth, diagonal). For good proportion, the container should not exceed 3.5 cm (1 ½") in height. To be viewed at eye level.

EXHIBITING NOTES:

TROUGH/CONTAINER GARDEN: A miniature garden designed to reproduce a natural ecosystem. The container frames and gives the garden its characteristic landscape shape.

Container grown plants should be exhibited in the container they are growing in and should have been in grown by the exhibitor for at least three months. Inconspicuous staking is allowed and plants will be viewed for judging from all sides.
