

# SEED LIBRARY

(located at the **Huntsville Public Library**)

## How it works!

### Borrow

- Choose 3-5 types of seeds. (See alphabetical list provided)
- Transfer seeds (a few per plant) into a new envelope (one of ours or one you bring)
- Replace the original envelope in the seed library. If it is empty, place it in the middle middle section of the clear bin.

### Grow

- Take your new seeds home and head start them inside (generally 6-8 weeks before the last frost - refer to the instructions on the package if applicable) or plant them directly in your garden after the frost if applicable.
- Water and watch them grow!

### Return

- Let a few of your plants go to seed
- Harvest your seeds, and let them dry out
- Label them and bring them back to the Library so everyone can enjoy them year after year!
- Register as a seed donor with Debora
